

STOP[®] DataPro[®]

**Delivering actionable data that
can lead to improved safety and
operational performance**

**DuPont
Sustainable
Solutions**

STOP DataPro® is a secure web-based application – accompanied by a new mobile app – that makes it easy to record and analyze safety performance data gathered on the STOP® observation checklists. The insights derived from STOP DataPro® provide actionable knowledge that can help lead to better workplace safety decisions and improved safety and operational performance.

The latest version of STOP DataPro® represents a dynamic overhaul of the system. From a fresh new look and feel, to expanded tracking functionality and a brand-new reports module, the entire application has been redesigned to improve the user experience.

Reports can be used to:

- Identify safe and unsafe trends.
- Help keep employees focused on safety.
- Prioritize areas for safety improvement.
 - » “We need training on this topic.”
 - » “We need to re-evaluate our procedures when operating this equipment.”
 - » “We need to raise awareness of this potential hazard/risk.”
- Create and track “corrective actions” identified in observations.
- Determine if unsafe observations are systemic or isolated instances.

THE STOP™ SAFETY OBSERVATION CYCLE

DECIDE → STOP → OBSERVE → REPORT → ACT

Use the mobile app to record and upload your observation data

- Capture safety observations using your iOS or Android device
- Use your company's custom checklists
- Save time and reduce use of paper checklists
- Edit observations at any time prior to syncing
- Sync observations into the authorized approval queue in STOP DataPro® via WiFi or data connection

There are two options available to track the vital data you receive from the STOP® formal observation checklist, the Single Site License and the Enterprise Site License.

Single site license

The single site license is designed for a single operating site or location and includes one super administrator user per site and unlimited access to an unlimited number of users. This license allows access to one STOP® Program and Observation Checklist, basic site reporting package and technical support services. Custom checklists will cost an additional fee. This subscription is designed for use at one site with unlimited access to the software by any number of users. The mobile application is included with license.

STOP DataPro® enterprise site license

The enterprise site license allows for an unlimited number of sites operated by a single company (may include more than one region). It includes two super administrators per license, one site administrator and one custom checklist per site, no limit on the number of accesses to the system for data entry, and a reporting specialist in each region. The mobile application is included with the enterprise site license.
